

BuzziBooth

BuzziSpace | Alain Gilles | 2010

As sound-absorbing microarchitecture, BuzziBooth invites people in to make a phone call, work quietly, or collaborate. The enclosed booth table carves out sensory relief from the noise of surrounding workspaces within an enclave covered in high-performance felt and upholstered in a wide array of fabrics. BuzziBooth is available as a single booth for sitting alone, as a standing booth, or as a side by side booth to support interactions with coworkers.
