

LIM360 by Pablo Designs

Pablo Studio | 2012

LIM360 is a personalized, high-performance task lamp whose slim, compact frame allows light to assert its presence. The second iteration of the Lim lamp concept, its efficient form shapes a plane of illumination powered by an equally efficient power source — a continuous array of high-output, energy-saving LEDs. Furthering its suitability for workspaces, it combines seamless, 360° arm rotation with an integrated USB port for charging mobile devices.
