Benson Recliners

Patient Room Seating

Changing postures improves health and can accelerate healing. Benson™ patient recliners uniquely enhance a safe and comforting experience during treatment or recovery. Patients, caregivers, and guests appreciate the simple design and intuitive controls. Dual-transfer arms make it safe and easy for patients to go from bed to recliner, which expedites movement and builds confidence.

Features

- Wall-saving option ideal for smaller rooms
- Recliner with glider offers subtle, soothing movement to foster well-being
- Sleep recliner fully extends to a horizontal position for naps or overnight stays
- Bariatric recliner option. Infinite position reclining system up to 45°
- Dual transfer arm available in standard or bariatric option
- Ideal for acute care, orthopedic, and cardiac recovery patient rooms, neonatal and postpartum rooms, and infusion areas
- Accessories include push bar for easy relocation, tray table to keep space tidy, holders for Foley bag or IV poles to organize space, and central or swivel locking casters to make it easy to move and prevent falls
