

## 2025 Design Trends Rehumanizing space amid the rise of AI

### Course Numbers

**AIA Course #:** HAW-1200 – 1 LU / HSW Designation / Intermediate Project Planning & Design/Building Design

**IDCEC Course #:** 122332 – 1 LU / HSW Designation / Intermediate Subject Code: 3. Interior Design Education/1. Instruction

### Course Description

This course dives into 2025 design trends that are both knowledge-based and human-centered, focusing on how space can respond to the increasing presence of artificial intelligence (AI) in our daily work. By examining historical tech disruptors, participants will understand their lasting impact on design. We will delve into AI's transformative role in current work activities and explore emerging trends aimed at rehumanizing the workplace in response to increasing automation. Expert panelists will share insights and strategies to intentionally apply these trends, creating environments that foster human connection, creativity, and well-being while adapting to technological advancements.

### Learning Objectives

1. Describe the historical impact of tech disruptors on workplace design
2. Explain how artificial intelligence will transform current work activities
3. Learn about trends to rehumanize the workplace in response to AI
4. Understand how to intentionally apply trends to rehumanize a space
